COMMENTS

amazing

Overall, good course. Professor Pibernik is great.
On the content side - I think too much time was spent on ML, AI - in a SC Design Course. Further, I like case-based learning more. Reading, case studies, papers - more material could have been shared.

I like the content of the course and the structure.

Good overall, but it's boring 3 classes in row

Awesome Elective! Should have more of these.

Great Professor who used his experience in consulting to teach a seemingly non-specific and non-directional course. Many possible answers to a company problem and that brought out the thinking cap in me alot.

Great teacher!

Sometimes it became repetitive but still hammered the point of using S&OP and the place where its heading to

The content was relevant but I feel it was just repetition from other classes, nothing new at all.

I enjoyed this class! The topics we covered were interesting but could have been covered quicker. We spent too much time on some topics and it could get dry.

The course was perfect and very educative in terms of Sales and Operations Planning plus the technologies useful for it.

This course is very important as gives more practical insight to the application of all aspects of supply chain management in real life
