

**ZLOG Class of 2019
MZ.590 SCIS & S&OP**

Instructor: Richard Pibernik

QUALITY OF TEACHING

		Av.	1	2	3	4	5	6	7
1	Gives well prepared, relevant presentations	6,9	0	0	0	0	0	4	20
2	Explains clearly, answers questions	6,8	0	0	0	1	0	1	22
3	Uses visual aids (board, etc.) well	6,6	0	0	1	1	0	4	18
4	Speaks clearly and well	6,9	0	0	0	0	0	2	22
5	Encourages questions and class participation	6,6	0	0	0	1	0	4	19
6	Stimulates interest in the subject	6,6	0	0	0	0	1	5	18
7	Overall rating of the professor	6,9	0	0	0	0	1	3	20

SUBJECT

8	Pace (1= too slow, 7= too fast)	4,5	0	0	3	10	8	1	2
9	Organization and continuity of the subject content (1=very poor, 7=excellent)	6,6	0	0	1	0	1	4	18
10	Overall rating of the subject content (1=very poor, 7=excellent)	6,6	0	0	1	0	1	2	20

Overall rating

6,8

* Perfect

* Wish we did not have all 9 hours so close together. Great subject matter deserves to be better spaced out. Great class & material

* Perfect

* Richard is excellent!

* Very well structured classes, very well explained for people who's new to the subject. Hope to see more classes with him!

* The content is very interesting and the teacher is very experienced in it. He encourages class to be engaged

- * I consider this is an appropriate topic. It came in the right time and let us know not only the application of concepts we have learnt by now but also the implications and real problems that we might face in the real world
- * It was a very good class although I think more time should be invested in order to get more detailed explanations
- * It is just the right moment to have this subject because it connects all the math in analytics and inventory with the real world
- * The subject was really interesting, Richard was a great professor. He knows how to communicate, transmit the information. My only complain is the scheduling. 6 hours in a row is too much. But overall it was really interesting. I would put some more time on it so Richard can address a little bit more each case study
- * Excellent professor, would love to have more classes with him!
- * Great professional, gives great insights and supports them with real-life examples
- * The instructor is well prepared. The topic is not easy to digest due to my low or few experience in the S&OP area. I think it was pretty useful
- * I am very happy with the course I would like to have some practical exercises and more quantitative approach. Professor was excellent, very dynamic and knowledgeable
- * I would have appreciated a higher % if the course focusin on S&OP rather than on IT. Only 1 out of the 3 sessions were focused on S&OP. Regarding the S&OP session, I would have appreciated spending more time on each step of the process, discussing about the inputs, process and outputs, instead on mainly taking about the implementation challenges
